Strategic threat advisory services
Preparing you to be secure

Physical security threats most often come without warning. Today, every growing organisation needs to be ready to combat such risks to stay ahead in business. Physical security threats can be broadly summarised as events or activities that hamper the growth of an organisation or prevent it from achieving its strategic goals. These threats can emanate from multiple sources and can even be a spillover from incidents or occurrences in other organisations. They are different from day-to-day threats and the nature and magnitude of impact often have larger repercussions on organisations and their people.

In today’s dynamic environment, an organisation faces two kind of challenges - external and internal. The external challenges are of a continuously evolving nature, often arising from the political, social, economic and demographic environment. When coupled with technological advancements, they often become the key sources of security threats for organisations. The internal challenges can be unmapped threats, outdated mitigation plans, collusion and untreated vulnerabilities.

Security threats can take a heavy toll on organisations—ranging from loss of human life, loss of organisational assets, financial loss, impact on brand and legal issues to even shutting down of business.

Businesses need to identify these security threats and prepare a mitigation plan for sustenance. The approach has to be proactive to be able to garner maximum benefits and keep pace with the dynamic threat environment surrounding us.

Why PwC

- At PwC, our team can help you in identifying strategic threats related to physical security and assist you in implementing a framework of preventive and detective controls to minimise the risks to an acceptable level. We have proven capabilities in both greenfield and brownfield establishments, smart cities, ports, etc.
- The team consists of professionals formerly associated with armed forces and law enforcement, certified fraud examiners, critical infrastructure protection specialists, smart city experts, business continuity as well as crisis management experts.
- We bring rich and diverse experience in executing similar kinds of projects successfully across different sectors like critical infrastructure, large-scale manufacturing sector, banking sector, smart cities, hospitality, educational institutes, ports, places that get a high footfall such as malls and exhibition centres etc.

Our approach

We can help you combat physical security threats by:

- Identifying different physical security threats that an organisation can face along with the probability of an occurrence and impact
- Identifying worst-case scenarios for threats, deciding on organisation’s risk-bearing capabilities and planning counter measures accordingly
- Formulating a well-developed strategy for mitigation with strong leadership intent
- Deploying suitable measures and controls (preventive intelligence, trained manpower fit for the job, processes and technology) with optimum utilisation of resources to be proactive
- Developing an effective incident and crisis response plan including integration with external agencies
- Deploying sustenance measures to maintain the robustness of posture
- Conducting frequent reviews and adapting to change requirements

Benefits you get

- Development of a best-fit risk mitigation plan to cater to current and future threats aligned to business objectives
- Cost-effective solution with optimum deployment of controls having a balanced mix of the technology, process and people components
- Compliance with security standards and industry/international best practices
- Robust crisis management framework
- Real-time monitoring for improved situational awareness
- Vendor neutrality
- Scalable framework keeping in mind future growth and technology advancements
