

Oil and Gas

How PwC can help:

- Understanding the policy and regulatory environment
- Regulatory and tariff filing to the Petroleum and Natural Gas Regulatory Board
- Developing plans for market entry, investments and expansion plans
- Developing strategies across portfolios, businesses, operations and innovations
- Bid management for exploration and production (E&P) acreages under New Exploration Licensing Policy (NELP) and coal bed methane (CBM) licensing rounds, licences for city gas distribution network, underground coal gasification, and transportation pipelines
- Contract and procurement strategies
- Gas and LNG price analysis
- Developing strategy for sourcing gas, gas sale purchase and transportation contract reviews
- Digital and technology strategy and implementation support
- Operational efficiency improvement projects across supply chain optimisation, business process reviews, organisation design, and manpower planning and assessment
- Managing the deal cycle from initiation to due diligence, transaction support and deal closure
- Risk management strategy and frameworks.
