PwC’s privacy solutions: Building trust with people
PwC helps organisations understand their data privacy obligations, navigate the underlying technology, demonstrate accountability and build trust with customers, employees and third parties.
Changing Indian regulatory landscape: Draft Indian Data Privacy Bill, 2019

Applicability and roles

01 It applies to the private and government sectors.

02 It extends to all Indian and foreign companies processing data within Indian territory.

03 A data fiduciary is one who alone or in conjunction with others determines the purpose and means of processing personal data.

04 A data processor is one who processes personal data on behalf of a data fiduciary.

05 A data principal is an individual whose personal data is being processed.

06 Fines up to 2–4% or INR 5–15 crore of the total worldwide turnover, or whichever is greater

Top privacy challenges faced by industry today

- Locating and identifying personal data
- Using data ethically and managing new technologies
- Building trust with customers through transparency
- Securing personal data
- Bringing about a cultural shift in the organisation
- Building trust with people through transparency
What does the law say?

- Data audits
- Data privacy impact assessment
- Specific grounds of processing personal data focused on consent
- Data protection officer (DPO)
- New norms for children’s data and guardian data fiduciary
- Free, informed, clear and specific consent
- Sandbox for innovation in AI and ML

- Data subject access rights, including right to erasure
- Consent manager for managing consent for data principals
- Published privacy by design policy
- Wider definition of personal data
- Data localisation
- Data security focused on privacy controls like de-identification
- Inform DPA of data breaches
- Social media intermediary to be termed as significant data fiduciary
What does this mean for you?

Every new law and compliance requirement brings in a lot of changes in an organisation, be it small or large. While each of these phases will require effort at your end, it also brings in opportunities for optimisation and better governance.

- Practise privacy by design
- Monitor and assure
- Manage individual rights and breach management process
- Secure data through technology investment/changes
- Establish accountability and strategy
- Create stakeholder awareness
- Conduct risk assessment
- Evaluate current state and impact
- Establish data lineage and governance
How can we help?

We have built a suite of products and services that will help you create a trust-based environment and a strong privacy by design culture to overcome privacy challenges. Whether you need to assess your readiness to comply with a privacy regulation, demonstrate accountability or re-engineer your privacy governance to show trust, one or more of our solutions can meet your needs.
